## ChemTUFF Pumps in Action

ChemFeed Metering Pump Olympics were held recently at Catawba WTP in South Carolina. A grueling 60 day in-plant head-to-head competition between Eccentric, Watson Marlow SPX, Pulsafeeder and PeriFlo **ChemTUFF** chemical metering pumps.

***And the Winner ... PeriFlo ChemTUFF with a Contract for SIX PUMPS !!!***

Challenged to prove superior performance in pumping 12-1/2% Sodium Hypochlorite from 0.71 to 42.8 gph @ pressures up to 115 psi. **ChemTUFF proved a winner in every major category, including ease of installation, programming, performance and maintenance.**

**Easy Installation & Programming:** **ChemTUFF pumps are fast out of the blocks,** featuring a compact design, quick connect fittings, integral NEMA 4X controls, 9' of power cable and 115VAC grounded plug - true plug and play installation. Complete factory testing and pre-programmed controls provide easy start-up and assured performance.

**Metering Performance & Low Maintenance:** **ChemTUFF pumps are dependable,** featuring PeriFlo X4 Sensorless Vector VFD technology and ChemDuty, Washdown-Duty, Inverter-Duty NEMA motors for precise flow control. **ChemTUFF's** HALAR coated housings and one-piece non-metallic roller/bearings provide corrosion resistance in a simple, robust design for maximum long-term reliability in harsh chemical environments.

Compliments of Daparak – Charlotte, N.C.
