*Chem*TUFF Pumps in Action

Four of the Six ChemFeed Champions mount the podium and receive their awards at the Catawba River WTP in South Carolina. Having soundly defeated their competitors in a grueling 60 day head-to-head in-plant competition, it is now time for the rugged Periflo *Chem*TUFF Champions to go to work 24/7, feeding 12-1/2% Sodium Hypochlorite as part of the plant's final disinfection process.

These rugged *Chem*TUFF Champions are designed to provide maximum long-term metering reliability in the most aggressive chemical environments. Featuring a robust, corrosion resistant design, HALAR coated housings, one-piece non-metallic roller/bearings, state-of-the-art leak detection and robust, operator friendly NEMA 4X controls.

***Chem*TUFF ChemFeed Champs - Quick Installation, Easy Programming, Fast Start-Up, Precision Metering Performance, Long-Term Reliability, Long Tube Life & Easy Maintenance**
